SUMMARY	Full-Stack Developer with two years of hands-on experience building web/mobile/desktop applications primarily within the Microsoft technology ecosystem and Javascript frameworks. I take a fundamentals-driven approach to development — striving to understand the core mechanics behind the frameworks, tools, and libraries I work with rather than relying solely on abstraction. I bring strong English communication skills, a structured problem-solving approach, and a collaborative attitude to team environments. I am comfortable engaging in technical discussions, learning from peers, and actively contributing to shared understanding of project architecture and system behavior. Always eager to expand my knowledge, I am committed to continuously improving my technical depth and adapting to new challenges across evolving technology stacks.	
SKILLS	Core Stack - Backend: ASP.NET Core, REST APIs, WebSocket, Authentication/Authorization, JWT/OAuth2/OIDC, Node.js - Frontend (Web): React 18, Vite, Next.js, HTML, CSS, JavaScript Soft skills - Clear technical communication and proactive problem investigation - Strong self-learning and research ability - Collaborative team member, eager to learn and discuss - Fluent English (technical & business) Application Architecture & Domains - Desktop/Mobile: .NET MAUI, React Native, WPF, WinForms - Cloud & Deployment: Azure App Services, Windows IIS, Vercel, Firebase, on-premise deployment - Fullstack client-server architecture, admin dashboard development, real-time monitoring systems - Payment/order management systems, technical support and customer-driven feature delivery	
PROFESSIONAL EXPERIENCE	Fullstack Developer June 2025 – Present EMCT Company Limited - Contributed to the development and maintenance of multiple business-oriented products, including cross-platform mobile applications, Windows desktop software, and web-based systems. - Participated in a fast-response support team, delivering timely bug fixes and feature enhancements to meet urgent customer requirements. - Designed and implemented new features based on client demands, integrate with existing system architecture through testing and validation. - Managed application release processes and supported on-premise deployments, including remote server configuration and maintenance via Remote Desktop.	

PROFESSIONAL EXPERIENCE	Software Development – Contractor February 2025 – November 2025 Flint Avenue • Worked as a contractor within the software development team, contributing to the design and implementation of application features across multiple projects. • Lead developer on a dedicated project, taking ownership of technical decisions and acting as the primary point of contact for client communication and requirement clarification. • Collaborated across teams on additional projects, expanding technical exposure and gaining hands-on experience with diverse system architectures and business domains.
	Software Developer – Intern June 2023 – September 2023 Netpower Vietnam • Registered intern for 3 months. • Learned web development fundamentals, including UI and system design, SOLID principles as well as different technologies like React, .NET,... • Expanded personal network, learned basic technical skills, assimilate self with corporate culture.
EDUCATION	Texas Tech University July 2024 – Jan 2025 Doctor of Philosophy in Computer Science – Admitted (2024) • Admitted to the PhD program in Computer Science and completed one semester of graduate-level coursework • Worked as a Research Assistant, completed several collaborative software development projects. • Transitioned from doctoral studies to pursue full-time industry experience in software development.
	Ho Chi Minh City University of Technology 2020 – 2024 Bachelor of Computer Engineering • Studied the core and advanced areas of Computer Science and Computer Engineering. • Gained practical experience working on real-world, team-based projects with other students and professors. • Attended many extracurricular activities, club meetings and collaboratively organized school events.
ADDITIONAL INFORMATION	• Languages: English, Vietnamese • Certificates: Academic IELTS 7.5/9.0 (2019), Duolingo English Test 145/160 (2024).
PROJECTS EXPERIENCE	BDApp on Android/iOS (Fire control and monitoring) June 2025 – Present • Description: An end user mobile application that displays real time alarm statuses from building fire panel, CCTVs and environment sensors. BDApp is a comprehensive Industrial IoT monitoring and control platform that enables remote facility management across multiple sites and countries. The system solves the problem of distributed infrastructure monitoring by connecting edge hardware controllers (BDCon) to a centralized platform, providing real-time data visualization, alarm management, and remote control capabilities. • Employer: EMCT Company Limited • Role: Fullstack Engineer. • Technologies: .NET MAUI, ASP.NET Core, WPF, React, MySQL. • Project team size: 4 members

PROJECTS EXPERIENCE

BDPark (Car parking history and payment management) | January 2026 – Present

- Description: BDPark is a comprehensive smart parking management system designed for residential complexes (apartments/condominiums), commercial buildings, and public parking facilities in South Korea. It solves the core problem of automated vehicle access control and parking fee management by integrating license plate recognition (LPR) cameras, barrier gates, LED displays, and payment terminals into a unified platform. The system helps residents, parking admins, property management companies and visitors experience a fully automatic parking and payment system.
- Employer: EMCT Company Limited
- Role: Fullstack Engineer.
- Technologies: ASP.NET Core, WPF, WinForm, React, MySQL.
- Project team size: 2 members

BAdmin (Internal admin dashboard) | July 2025 – Present

- Description: BAdmin is an admin dashboard built with React 18 + TypeScript using Vite. The UI is built with custom components with Emotion for CSS-in-JS styling. State is managed via Jotai and TanStack Query for server state, with Axios for HTTP. The dashboard manages users, control and configure data channels, registered locations, hardware drivers properties. It also manages websocket sessions between the central server and multiple IOT controllers.
- Employer: EMCT Company Limited
- Role: Frontend Engineer.
- Technologies: React, EmotionCSS, Tanstack Query, React Hook Form, Axios, Jotai,...
- Project team size: 1 member

Medical Information Simulations (Medical Tests QC Software) | February 2024 – May 2025

- Description: A simulation for Medical Tests Quality Control used as a teaching tool for TTUHSC students, a collaboration with Dr. Carter from TTUHSC.
- Employer: Dr. Carter – Associate Professor/Program Director for Medical Laboratory Sciences and Molecular Pathology at TTUHSC
- Role: System designer, Lead developer, Fullstack developer, Technical Support.
- Technologies: React, .NET 8, SQLServer, Azure Services.
- Github: https://github.com/yuh137/medical_information_simulation
- Deployment: <https://medical-information-simulation.vercel.app/>
- Achievements: 2nd in TTUHSC Innovation Hub 2023 iLaunch Competition.

GeneHub (Genes, Diseases and Pathogens Search Engine) | April 2024 – Jan 2025

- Description: A search engine for Genes, Diseases and Pathogens, a collaboration with Dr. Tetyana from TTUHSC.
- Employer: Dr. Tetyana
- Role: System designer, Lead developer, Fullstack developer.
- Technologies: React, .NET 8, SQLServer, Azure Services.
- Github: <https://github.com/yuh137/GeneHub>
- Deployment: <https://gene-hub.vercel.app/>

Tea2Go (Tea shop ordering platform) – Flint Avenue | February 2025 – October 2025

- Description: A tea shop ordering platform built with React Native and a React admin dashboard. Customers browse nearby locations via Google Maps, authenticate with Google/Apple/FirebaseAuth, and pay via in-app purchases. The admin panel manages store locations, holiday hours, convenience fees, and scheduled push notifications. Backend is developed using Firebase (Firestore, Cloud Functions, Authentication).
- Employer: Flint Avenue
- Role: Developer.
- Technologies: React Native, React, Firebase, Firestore, JavaScript/TypeScript, Node.js
